KADUNA MEDICAL STUDENTS TACKLING AMR SCHOOLS

18-20 November 2025 | Kaduna, Nigeria

Participants were first asked what they understood about antimicrobial resistance. The team then delivered simple, age appropriate awareness sessions followed by interactive questions, discussion and practical handwashing demonstrations.

From awareness to environmental action

21 November 2025 | Expert-led Webinar

From Understanding to Action

Participants were encouraged to explain AMR in their own words, ask questions and discuss antibiotic-use practices. Complex concepts were simplified to make AMR understandable and relatable.

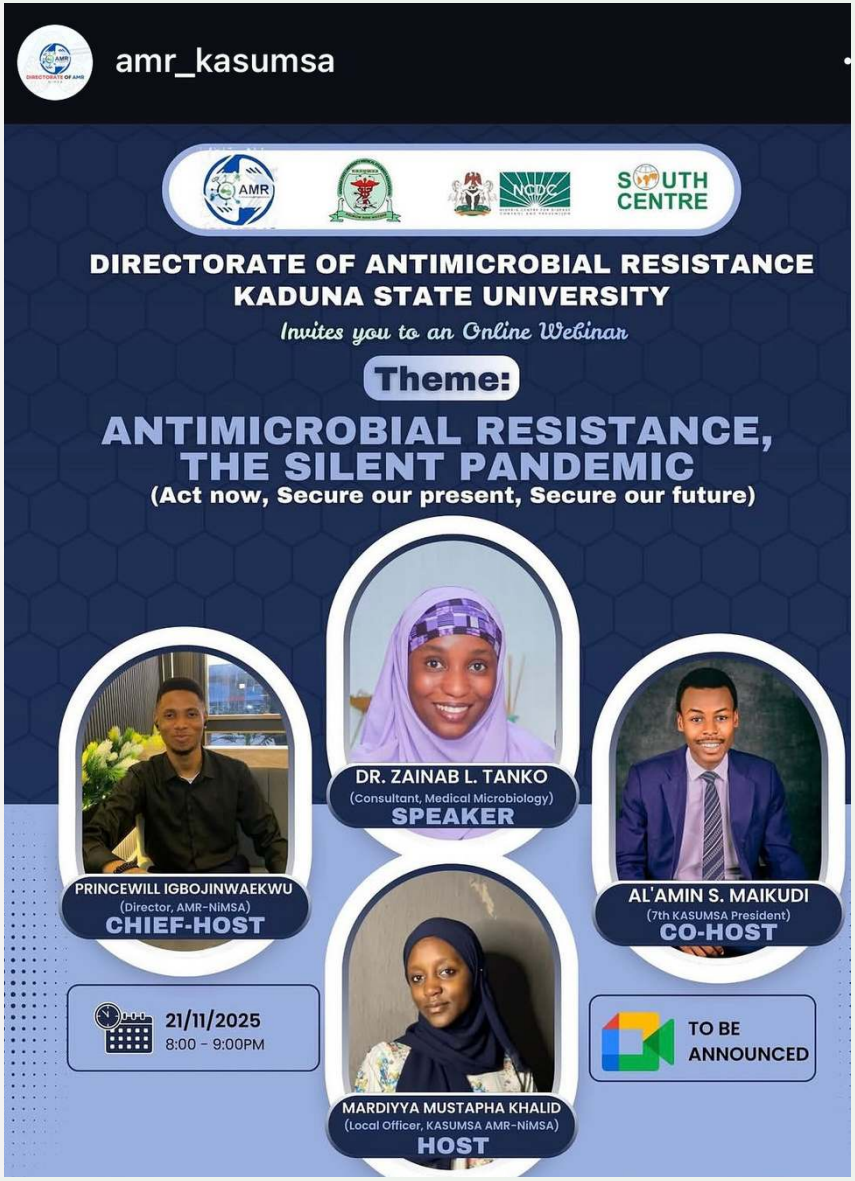

ASSESS → **EDUCATE** → **ENGAGE** → **REINFORCE**

Understanding the challenge

Building knowledge and awareness

Encouraging dialogue and participation

Strengthening positive practices

Taking AMR Awareness Across the metropolis

22 November 2025 | Kaduna Metropolis

AWARENESS WALK + MARKETPLACE COMMUNITY ENGAGEMENT

UNDERSTAND → **REFLECT** → **ACT** **SHARE**

Community members discussed antibiotic-use practices and were introduced to the dangers of inappropriate antimicrobial use. Participants expressed willingness to use antibiotics responsibly and share the information with others.

AMR is interconnected across human, animal and environmental systems. Community-level prevention is therefore an important part of broader AMR action.

Youth led action. Community engagement.
Responsible antimicrobial use.
